Affiliate Promo Kit · HelpfulByte

Affiliate Rules

Promotional guidelines for approved LogoVary affiliates.

Purpose

These rules protect customers, affiliates and the HelpfulByte brand by keeping LogoVary promotions accurate and transparent.

1. Use accurate claims

Only promote features, formats, pricing and terms that LogoVary actually provides. Do not invent integrations, automation, results or guarantees.

2. No fake scarcity

Do not use fake countdown timers, fabricated deadlines or false claims that copies are running out.

3. No fake testimonials or endorsements

Do not create or imply customer reviews, expert endorsements or case studies that do not exist.

4. No misleading income claims

LogoVary is software for logo-production and delivery work. Do not market it as a guaranteed income system, business opportunity or earnings promise.

5. Use paid advertising responsibly

Do not impersonate HelpfulByte, bid on ads in a way that falsely presents your page as the official HelpfulByte site, or imply an official endorsement you have not been given.

6. Do not redistribute customer files

Affiliates may use approved promotional assets, but must not distribute the LogoVary installer, customer delivery ZIP, licence materials or customer documentation as a substitute for purchase.

7. Use your JVZoo tracking link

Approved affiliates should send buyers through their assigned JVZoo affiliate link so sales can be attributed correctly.

8. Respect brand and legal requirements

Do not use deceptive domains, misleading product names, unlawful spam, copyright-infringing promotions or claims that violate applicable advertising rules.

9. Keep launch pricing accurate

Only describe US\$67 as a launch price while that offer is genuinely active. Update promotions when the price changes.

10. Ask when uncertain

For affiliate/JV questions or approval of unusual promotional methods, contact support@helpfulbyte.com.
